

Dynamics AX Consultants

Dynamics AX Consultants - Dynamics AX implementation experience, including requirement gathering and business analysis skills and the ability to act as Lead Implementation Consultant on projects.

Would you like to work for a growth company with excellent new project wins working at the cutting edge of AX development. Our client is a very successful Microsoft Business Solutions Gold Partner - they have a lot of talented people, they get good projects and have a culture centred on developing and training their consultants.

To join the team, the key requirements include an ability to define business requirements, build a rapport with clients, the ability to lead, take responsibility for Dynamics AX implementation projects, and develop new business.
