

**X++ Developer**

Dynamics AX \ X++. Finance and Trade & Logistics Modules

A fantastic opportunity has arisen to join one of the best known MS Gold Partners in the UK for Dynamics AX.

My client is looking for 3 Dynamics AX X++ Developers to join their dynamic team to start as soon as possible.

You will ideally have a strong Dynamics AX implementation background in either a reseller or End Client capacity using your X++ skills.

Ideally with experience Finance and Trade & Logistic modules, my client is committed to training developers and consultants to keep them at the leading edge of Microsoft Dynamics.
